

Mashura AI Module

Advanced AI capabilities including Offline Speech-to-Text, Translation, Archiving, MS Word Plug-in, and 3 real-time languages.

CORE CAPABILITIES

✓ Offline Speech-to-Text

Highly secure, on-premise speech recognition engine that transcribes meeting audio to text with exceptional accuracy without any reliance on external cloud services or internet connectivity, guaranteeing absolute data privacy.

✓ Real-Time Multi-Lingual Translation

Advanced neural machine translation supporting up to 3 real-time languages simultaneously. Delivers instant, context-aware translations to participants, bridging communication gaps in diverse corporate and governmental sessions.

✓ Intelligent Archiving & Indexing

Automated and secure archiving system that stores all meeting transcripts, translated records, and audio logs. Features smart indexing for rapid search and retrieval of historical session data and compliance auditing.

✓ Native MS Word Integration

Seamless plug-in integration directly within Microsoft Word, allowing users to instantly generate, format, and edit official meeting minutes and transcripts using standardized templates directly from the Mashura AI engine.
