

Servio Operation License

Empowering facility management and operations teams to instantly address physical room issues. Ensures seamless handling of inconveniences like broken furniture, cleanliness, or structural repairs.

Key Capabilities

- Real-Time Issue Flagging:** Instantly receive alerts for physical room inconveniences (e.g., broken chairs, maintenance needs).
 - Status Tracking:** Monitor the progress of maintenance tasks from the initial report to final resolution.
 - Cross-Platform Access:** Access operations alerts on mobile devices or command center dashboards.
- Task Dispatching:** Automatically assign repair and maintenance tasks to the appropriate operations staff.
 - Historical Logs:** Maintain a comprehensive history of all room maintenance events and operational fixes.
