

Servio Server (Up to 50 Users)

Robust and reliable on-premise or cloud-ready server infrastructure designed to host the Servio ecosystem for small to medium scale deployments.

Key Capabilities

- High Availability:** Architecture designed for 99.9% uptime with failover capabilities.
 - Scalable Architecture:** Easily scalable configuration allowing growth beyond initial user limits.
 - Monitoring Dashboard:** Comprehensive system health and resource usage monitoring.
- Data Security:** Enterprise-grade encryption for data at rest and in transit.
 - Automated Backups:** Built-in automated backup schedules ensuring zero data loss.

Hardware Specifications

Part Number	TR-SRV-SER-01
Processor	Intel Xeon E-2200 series or equivalent AMD EPYC
Memory	32GB ECC DDR4
Storage	2x 1TB NVMe SSD in RAID 1 configuration
Network	Dual 10GbE Network Interfaces
Operating System	Linux/Windows Server (Client specified)
Form Factor	1U Rackmount Server
Capacity	Optimized for up to 50 concurrent Servio users
